 GCP Certified*11, Authorized Trainer

 AWS/Azure/NVIDIA Certified

National Cheng Chi University (NCCU)
Master of Statistics, graduated in 2019

National Tsing Hua University (NTHU)
Bachelor of Mathematics, graduated in 2017

WORKING EXPERIENCE

International Business Machines Corporation (IBM) | Consultant - Application Architect 02.2025 ~ present

Orchestrated core system transformation for major banking and insurance clients, translating complex business requirements into high-availability technical architectures

- **Architectural Strategy & Standardization:** Defined cross-system data integration principles and technical standards to ensure scalability and stability for large-scale enterprise frameworks
- **Business-Tech Bridge:** Partnered with business units to transform abstract concepts into actionable scenarios, using professional narratives to drive project implementation

Trainocate Taiwan Co. Ltd. | Google Cloud Authorized Trainer (Freelancer) 09.2023 ~ present

Empowered enterprise clients through Google Cloud technical enablement, facilitating workshops to bridge technical gaps and realize strategic business visions

- **Business Imagination & GCP Advocacy:** Introduced Google Cloud Data services and AI technologies to clients in TW/CN. Expanded business horizons and fostered brand affinity through workshops and experience sharing
- **Adaptive Tech Training:** Designed flexible, themed curricula for various enterprise levels (4.8/5 rating). Guided ~400 practitioners to earn professional certifications

President Chain Store Corporation | Technical Project Manager 07.2023 ~ 02.2025

Spearheaded digital transformation for a retail leader, integrating advanced tech into business scenarios to drive new growth opportunities

- **Generative AI Implementation:** Designed Gen AI chatbots for Books.com.tw's(博客來) first physical store, using LLMs to elevate customer engagement and streamline workflows
- **Real-time Data Pipeline:** Engineered the company's first real-time data transmission and subscription pipeline using microservices, enabling agile resource management and instantaneous data analytics

Nextlink Technology | Cloud Solution Architect 07.2021 ~ 07.2023

Transformed business needs into cloud-native solutions, focusing on enhancing system performance, reliability, and the maximization of data value for enterprise clients

- **Cloud AI & MLOps:** Built LLM-based knowledge bases (Vertex AI/LangChain/pgvector) and automated OCR pipelines, achieving a 30% reduction in manual costs and accelerating deployment via CI/CD

National Center for High-performance Computing | Data Scientist 09.2019 ~ 06.2021

Leveraged open-source tools to construct cross-domain business solutions, optimizing machine learning models and workflows to improve deployment efficiency

- **ML Research & Optimization:** Enhanced sepsis alert precision by 5x using Python/R and shortened deployment cycles from weeks to days through Docker-based workflow modernization

Awards & Data Volunteer

- T-Brain AI Competition: 4th Prize & Judging Award in "Recognizing Sounds Between Pets and Surroundings" (Co-organized by Tomofun)
- Data for Social Good (D4SG): Analysis Unemployed Labor and Recommend Candidates to Taipei Gov Social Welfare

Community & Side Project

- Google Developer Groups (GDG): Delivered 4+ technical sessions about AI/ML/serverless/visualization on GCP
- Technical sharing at SatRdays: "Voice Analysis in R 101"
- Vibe Coding implement: QR-code check-in, AI auto-gen BPMN swimlane, music album generation workflow, and presentation format converter
